The guarantee of successful breeding

CK INDUSTRIES

Made in France

Based in Marcoux in the South East of France, CK-Industries is a European manufacturer combining two types of expertise: tubular livestock equipment and manure evacuation systems. CK-Industries covers a large proportion of the needs of cattle, sheep and goat breeders, both indoor and outdoor.

A European actor in the livestock sector since

+40 years

+2000 km

of tubes processed and shipped each year

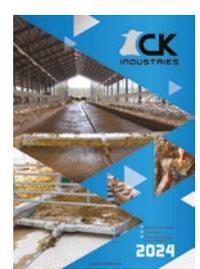

Cutting-edge know-how and technologies on a site of

+26 000 m²

+200 employees

Cattle

Calves

Sheep

Goats

Horses

steel

HLE

HLE Steel ? A powerful argument

CK-Industries uses High Yield Strength (HLE) steel for some of its products. Also used for major engineering structures, lifting gear and nuclear submarine hulls, this type of steel makes our products both lighter and stronger.

Whether HLE or standard, our tubes with the Véritube label come from French steelworks.

The guarantee of successful breeding

Our advice For a durable installation

Adapt the installation height to the size of the animals

Recommended installation height for headlocks :

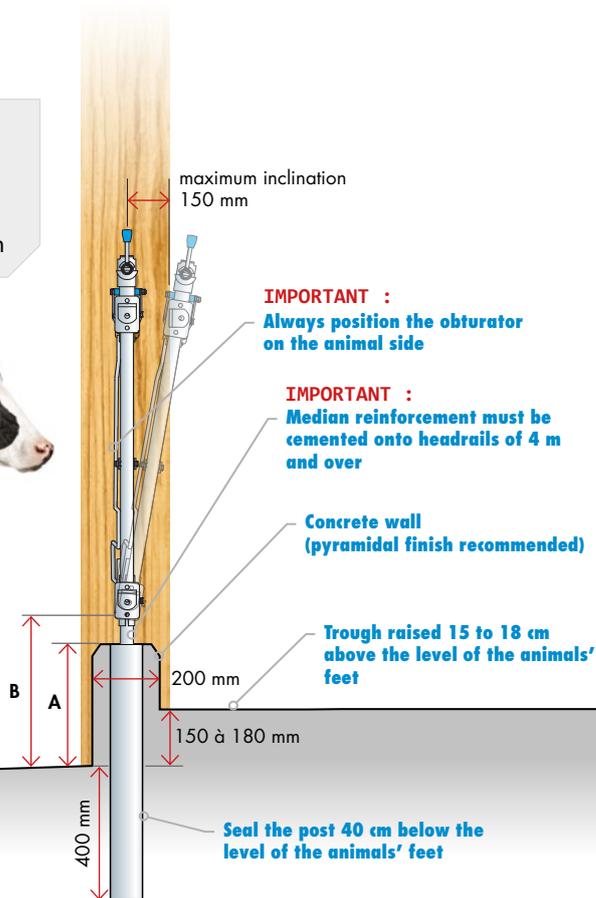

Adult cows : **A** = 450~500 mm | **B** = 550~650 mm

For heifers or Jersey cows : **A** = 400 mm | **B** = 500 mm

For calves up to 6 months : **A** = 250~400 mm | **B** = 300~450 mm

Optional incline

Use bituminous paint

IMPORTANT :

Preventing corrosion of galvanised steel in aggressive environments:

Despite all the care taken in manufacturing our products and the quality of the hot-dip galvanising treatment applied, corrosion can occur in certain conditions: acidity of slurry, manure or silage.

In these conditions, the only way to limit this phenomenon is to protect all parts in contact with aggressive products with a coat of bituminous paint. It should be noted that regular renewal of the coat of paint is necessary.

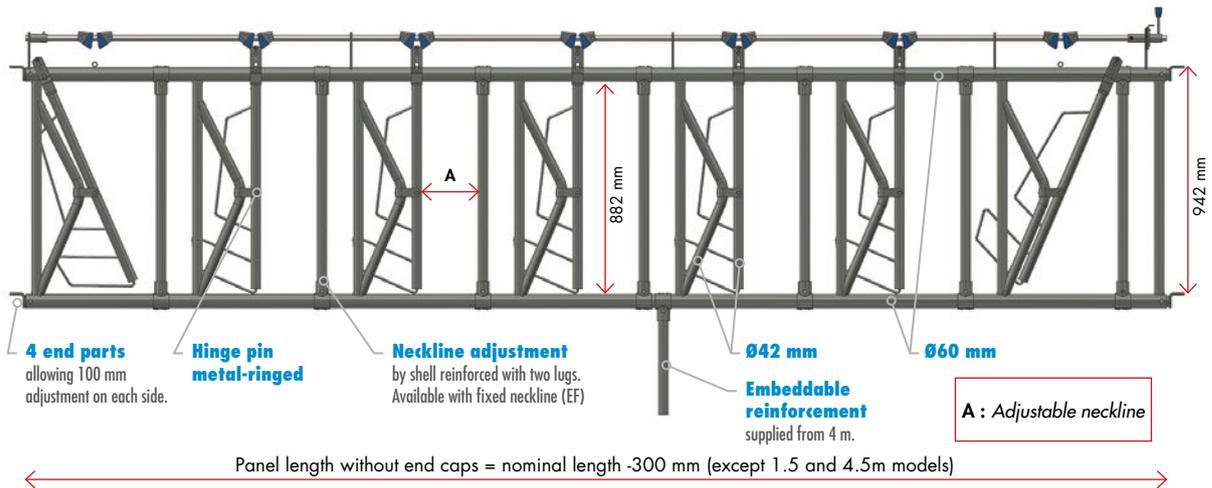

Other phenomena can also cause corrosion, such as electrolysis linked to parasitic currents (poor earthing, etc.). In these circumstances, the only way to stop the corrosion is to treat the cause of the problem.

We are offering for sale
a 5 L can of bitumen paint
bitumen paint under reference 10895.

CKI LIBERTY HEADLOCKS

Peace of mind for hornless cattle

Safe locking system
Individual locking at each position.
Automatic arm return

Noise reducer
High-strength nylon spacer.
Patented

Control handle
¼ turn with lugs
Learning kit
as an option, to guide young cattle into the feed fence from above
(Ref. 54200, p. 14)

Anti-hanging safety
Specific safety shape to minimise the risk of hanging if the animal falls. The shutter blocks the passage in any position (to be placed on the animal side)

Installation options :

- ▶ Standard end caps 300 mm (included in the panel)
- Options :
- ▶ 300 mm end caps on plate (for mounting between posts)
- ▶ Long end caps 500 mm
- ▶ 500 mm long end caps on plate
- ▶ Control pipe extension fitting
- ▶ Wall reinforcement (bolt-on)

▶ Endcaps pack page 14

The Liberty headlock is an anti-hanging safety headlock. It has the most reliable locking system on the market and is equipped with arms that automatically reposition themselves with an anti-head passage shutter that prevents any possibility of the animal being trapped in any position.

LIBERTY HEADLOCK

80460	1m / 1 place, ANS	28 kg	80492	5m / 6 places, ANS + sealing reinforcement	148 kg
70324	1,5m / 1 place, Adjustable bar for bull	32 kg	80430	5m / 7 places, ANS + sealing reinforcement	152 kg
80465	1,5m / 2 places, ANS	47 kg	80440	5m / 8 places, ANS + sealing reinforcement	162 kg

80435	5m / 7 places, FNS + sealing reinforcement	139 kg	80455	6m / 8 places, FNS + sealing reinforcement	168 kg
80445	5m / 8 places, FNS + sealing reinforcement	156 kg			

The lengths given correspond to the centre distances of Ø102 mm posts or 90x90 mm squares.
ANS : Adjustable Neck Size // FNS : Fixed neck size - Neckline dimensions vary from model to model, please consult us.

Also available in a special calf version, page 87.

WORKERS GATE

Patented Model

80498	Access for workers + place for 1 animal (right side), fixed neck size for dairy cow	40 kg
80499	Worker access end-piece + 1 place of headlock type LIBERTY left side fixed neck size for suckler cow	42 kg

Safety lock
with easy opening from below and automatic locking.

! End caps supplied with a reinforcement to be sealed in place, to be fitted where the end cap meets the feed fence.

► Accessories and spare parts page 14

CKI ADVICE

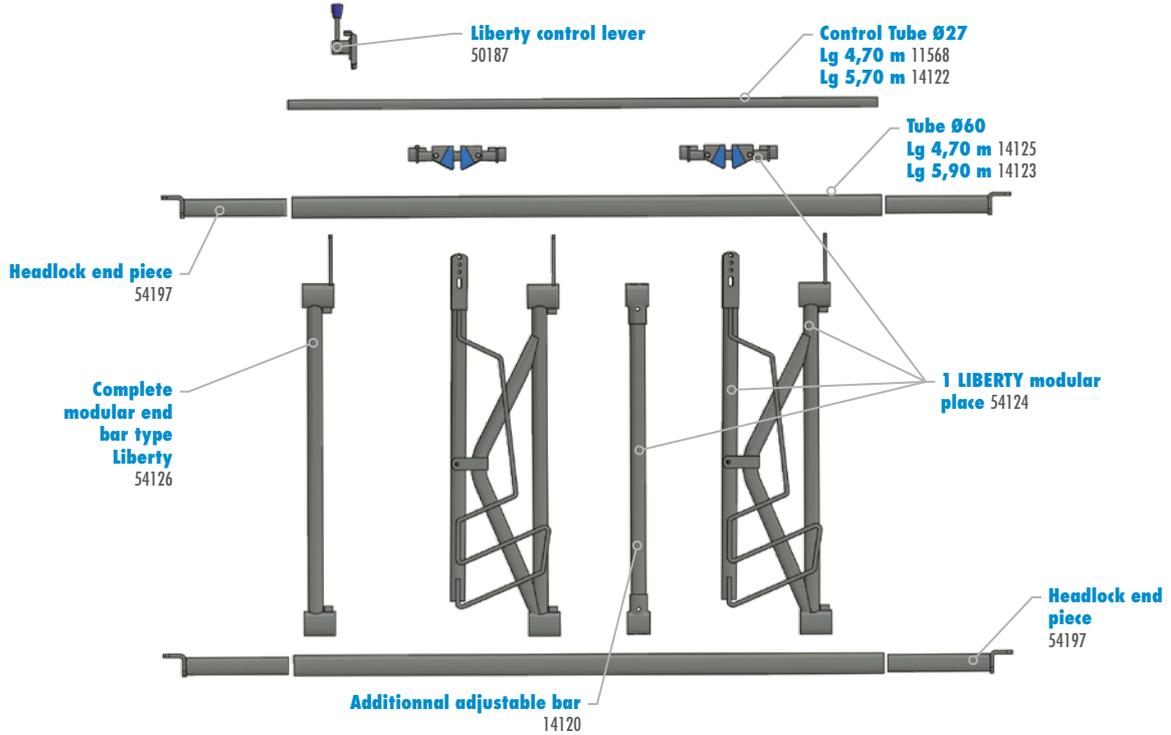

EXAMPLE OF THE USE OF ACCESS FOR WORKERS ON A FEED FENCE :

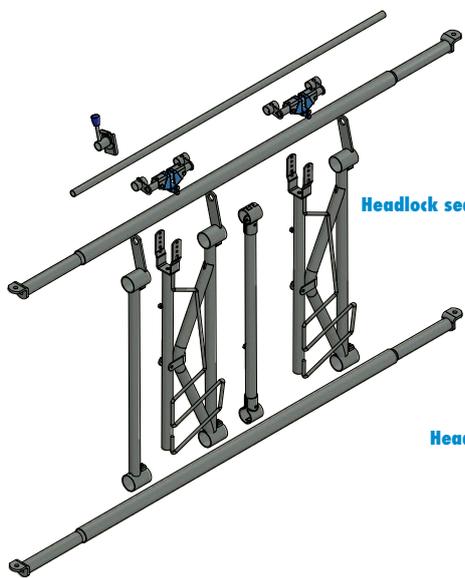

For 6 m / 8 places ANS + access for workers,
add 1 Headlock 5 m / 7 places (80430) + 1 access for workers (80499)

CKI LIBERTY HEADLOCKS

Modular version

► Pack embouts page 14

Headlock sealing reinforcement 10140

Headlock reinforcement to screw 10290

Anti-head rollover
Shutter to be fitted on the animal side.

After visiting several farms, from September 2022 I set up a building for 70 cows, with BIG COW Californian cubicles and LIBERTY headlocks. Everything is in CK-INDUSTRIES, even the nursery, which is equipped with individual calf pens. I'm very happy with the whole package. The steel is high quality and very solid. On a day-to-day basis, the workers gate on the fences are really practical and well thought out.

Nicolas Duriez, breeder of Montbéliardes in the Jura (France)

LIBERTY HEADLOCK MODULAR

54124	Liberty modular place	15 kg
14125	Horizontal tube D60, length 4.7m (two per 5m panel)	19 kg
14123	Horizontal tube D60, length 5.7m (two per 6m panel)	25 kg
11568	Control tube, length 4.7m (one per panel)	5 kg
14122	Control tube, length 5.7m (one per panel)	7 kg
54197	Headlock end piece + screws (four per panel)	1,4 kg
50187	Liberty control lever (one per panel)	0,8 kg
54126	Complete modular end bar type Liberty (one per panel)	5,5 kg
10140	Headlock sealing reinforcement	1,5 kg
10290	Renfort de cornadis sur muret à fixer	3,6 kg
14120	Additional adjustable bar + 42/60 shell	2 kg
14115	Adjustable bar + 42/49 shell	2 kg
10195	Headlock anti-noise buffer on brace + screws	0,1 kg

Modular headlocks are not compatible with manhole covers.

▶ **Accessories and spare parts page 14**

CKI ADVICE

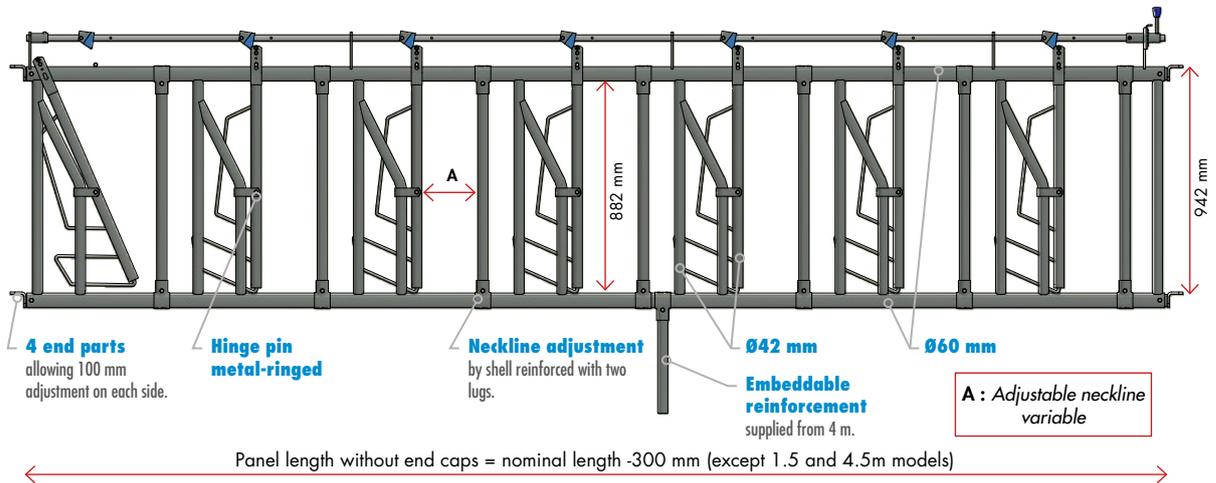

EXAMPLE OF USE : HEADLOCK 5 m / 7 places

- 7 Liberty modular place (54124)
- + 2 Horizontal tube Ø60 Lg. 4,70 m (14125)
- + 1 Control tube Lg. 4,70 m (11568)
- + 4 Headlock end piece + screws (54197)
- + 1 Liberty control lever (50187)
- + 1 Complete modular end bar type Liberty (54126)
- + 1 Headlock sealing reinforcement (10140) or (10290)

CKI ZEPHIR HEADLOCK

The simple, cost-effective solution

Tamper-proof locking system
Individual locking at each position.
Automatic arm return

Control handle
¼ turn with lugs.

Anti-head rollover
Specific shape to prevent passage in any position (to be placed on the animal side).

Installation options :

► **Fitting pack page 14**

- Standard end caps 300 mm (included in the panel)
- Options :
- 300 mm end caps on plate (for mounting between posts)
- Long end caps 500 mm
- 500 mm long end caps on plate
- Control tube extension fitting
- Wall reinforcement (bolt-on)

The Zephir Headlock is equipped with arms that reposition automatically and a head-passing device that prevents the head from becoming trapped in any position.

ZEPHIR HEADLOCK

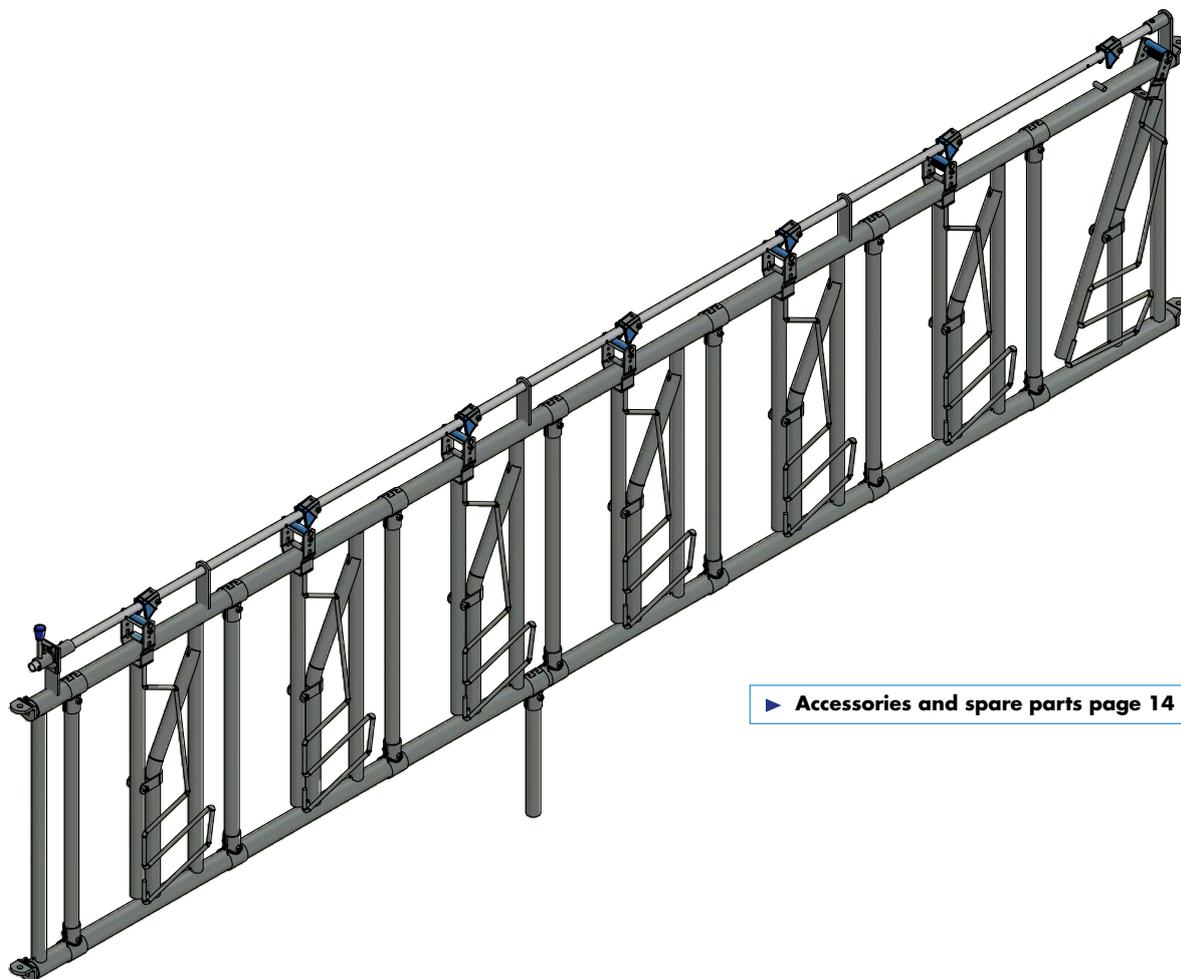

Allow 4 to 6 weeks for delivery.

55140	1m / 1 place, ANS	29 kg
55025	1,5m / 2 places, ANS	48 kg
55030	4m / 5 places, ANS + sealing reinforcement	120 kg
55040	4m / 6 places, ANS + sealing reinforcement	128 kg
55045	4m / 6 places, ANS + sealing reinforcement	132 kg
55050	4m / 8 places, ANS + sealing reinforcement	141 kg
55060	5m / 6 places, ANS + sealing reinforcement	148 kg
55070	5m / 7 places, ANS + sealing reinforcement	152 kg
55080	5m / 8 places, ANS + sealing reinforcement	155 kg
55090	5m / 10 places, ANS + sealing reinforcement	175 kg
55100	6m / 8 places, ANS + sealing reinforcement	168 kg
55110	6m / 9 places, ANS + sealing reinforcement	180 kg
55120	6m / 10 places, ANS + sealing reinforcement	192 kg

The lengths given correspond to the centre distances of Ø102 mm posts or 90x90 mm squares.

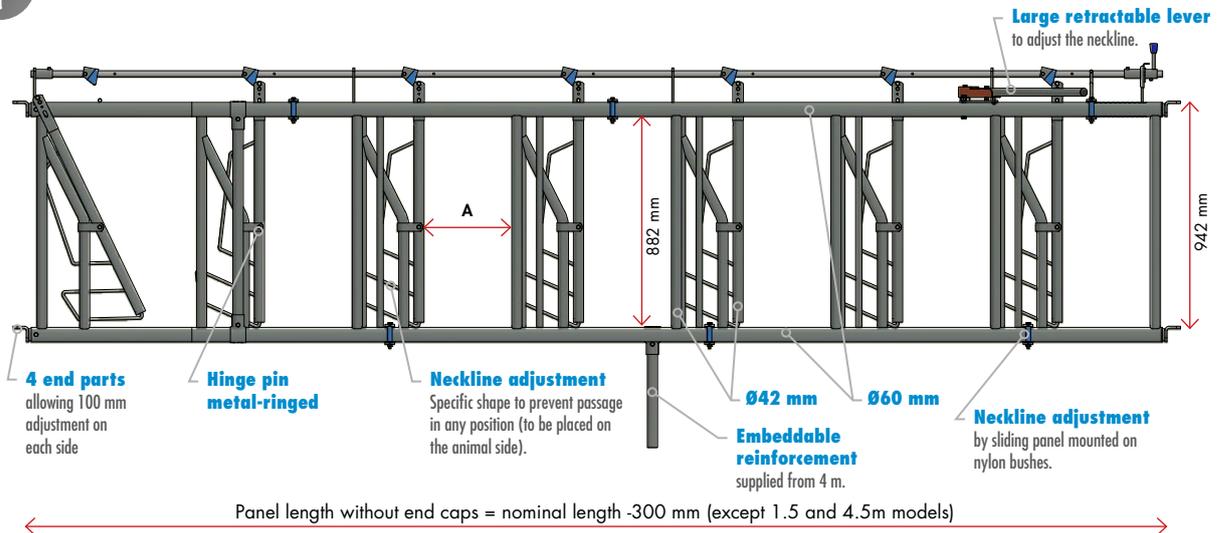

ANS : Adjustable Neck Size // FNS : Fixed neck size - Neckline dimensions vary from model to model, please consult us.

► Accessories and spare parts page 14

CKI FREELOCK HEADLOCK

Adjust the neckline in an instant

A : Adjustable neckline
 min 145(±5) mm to max 215 to 365 mm (depending on model)

Silent, tamper-proof locking system
 Individual locking at each position.
 Automatic arm return

Control handle
 ¼ turn with lugs.

Quick and easy neck adjustment
 A large retractable lever allows one panel to slide over the other. A lock ensures reliable adjustment from 145 to 320 mm depending on the model. Ideal for adapting the feed fence to the growth of the bullocks.

Installation options :

- ▶ Standard end caps 300 mm (included in the panel)
- Options :
- ▶ 300 mm end caps on plate (for mounting between posts)
- ▶ Long end caps 500 mm
- ▶ 500 mm long end caps on plate
- ▶ Control tube extension fitting
- ▶ Wall reinforcement (bolt-on)

▶ **Fitting pack page 14**

The FreeLock Headlock has a tamper-proof locking system, a double sliding panel with adjustable neckline, arms that reposition automatically and an anti-pass-through headrest that prevents the head from becoming trapped in any position.

We have 170 calvings a year and have had a FREELOCK adjustable feed fence barn since 2020. The easy, reliable adjustment is really practical and means we don't have to keep changing animals. After comparing with our neighbours, we found the CK feed fence to be the most advanced and robust. My father had already fitted a stanchion barn in the 1990s with a CK. The stalls are still in perfect condition. What's more, CK fitted us with two made-to-measure headlocks, a top-notch service.

Philippe GABERT, Charolais breeder in Saône-et-Loire (France).

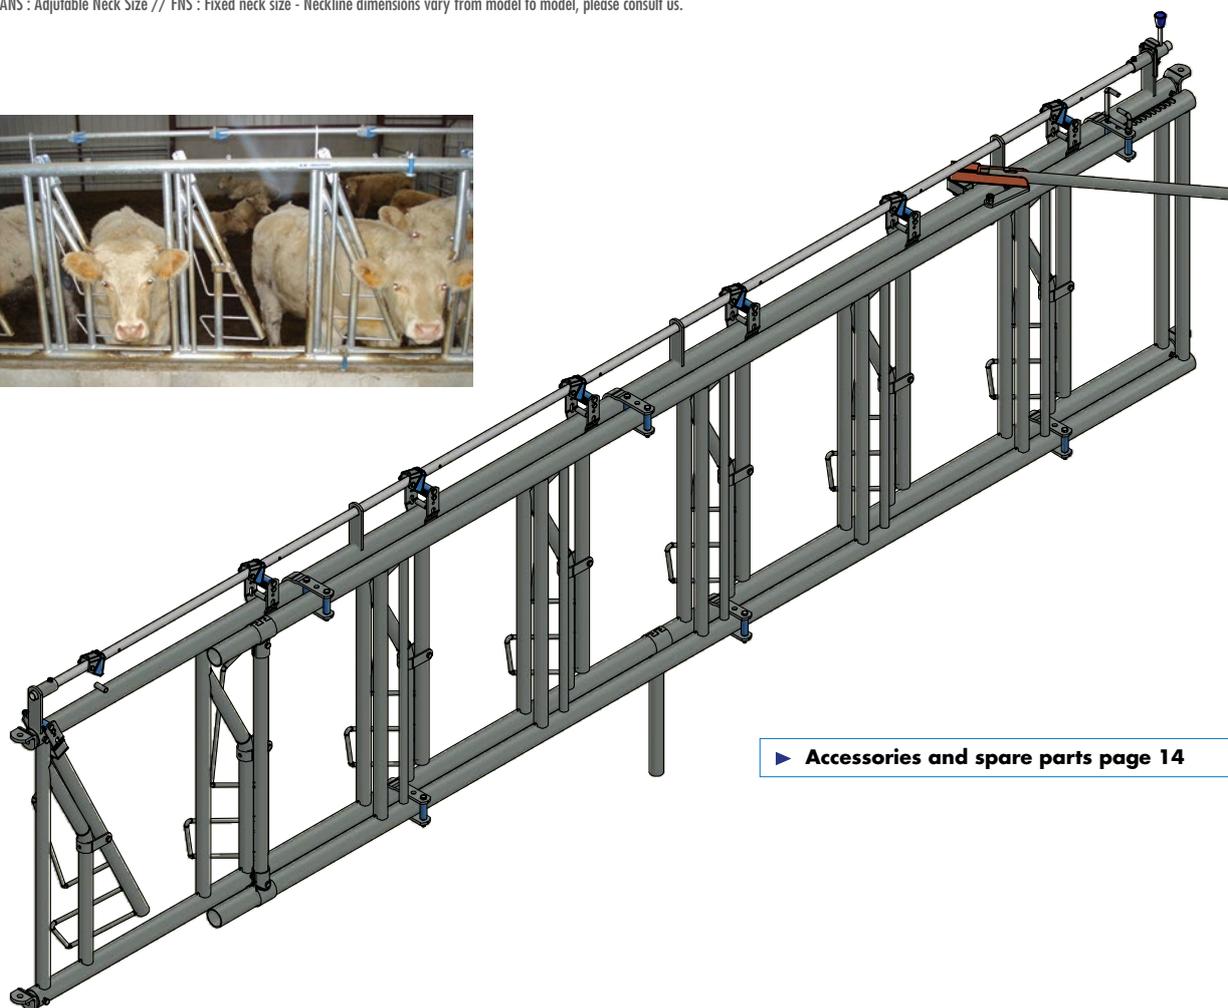

Allow 4 to 6 weeks for delivery.

SWEDISH TITAN Model

SWEDISH TITAN BULL adjustable Model 50176

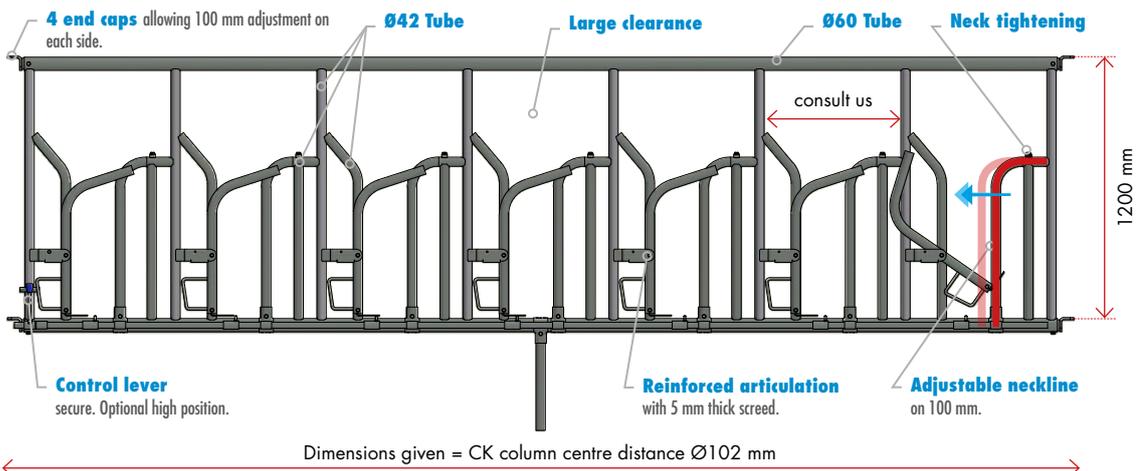

NEW

Supplied with high lever 50195 as standard

Obturators anti-calf passage

SWEDISH adjustable neckline Model

I converted my parents' dairy farm into a suckler farm with 90 Charolais dams. I wanted Swedish feed fences with total top clearance. I compared all the manufacturers at the Sommet de l'Élevage because I was looking for something really robust. I chose the Swedish TITAN CK-INDUSTRIES. They've been fitted since December 2023 and they've already convinced me. I then bought CK-INDUSTRIES extendable fencing and it's the same quality. It's robust and well-designed, you just have to compare.

Armand ADAM, Charolais breeder in Mayenne (France).

Allow 4 to 6 weeks for delivery.

SWEDISH HEADLOCK

50191	4 m / 5 places FNS + sealing reinforcement	124 kg

CKI GALVANISED TROUGHS

One-piece, practical and durable

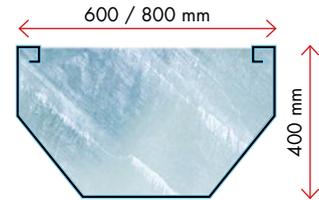

Adjustable feet
on plate.

Welded crosspiece
on models 4 m and over.

Drain plugs
Ø 35 mm at both ends.

Double flap edges
Less waste, more safety.

GALVANISED TROUGHS ON ADJUSTABLE FEET

51076	3 m x 0.6 m	495 liters	80 kg
51086	4 m x 0.6 m	660 liters	100 kg
51096	5 m x 0.6 m	825 liters	120 kg
51106	6 m x 0.6 m	990 liters	140 kg
51070	3 m x 0.8 m	730 liters	95 kg
51080	4 m x 0.8 m	970 liters	115 kg
51090	5 m x 0.8 m	1210 liters	142 kg
51100	6 m x 0.8 m	1450 liters	163 kg

CKI ADVICE

Prevent corrosion of galvanised steel in aggressive environments:

Hot-dip galvanising of CK-Industries equipment is one of the most corrosion-resistant surface treatments. However, given the ever-increasing concentration of corrosive products in slurry, manure and silage, we recommend that you coat all components (posts, troughs, etc.) in contact with them with bitumen-based paint.

We sell a 5-litre can of bitumen paint under reference 10895.

Change your life with an automated feed belt

? A moving-bottom feed belt to save time:

Now an essential tool for modernising existing livestock buildings or for new projects, the automated feeding belt can be adapted to suit your dairy or suckler herd.

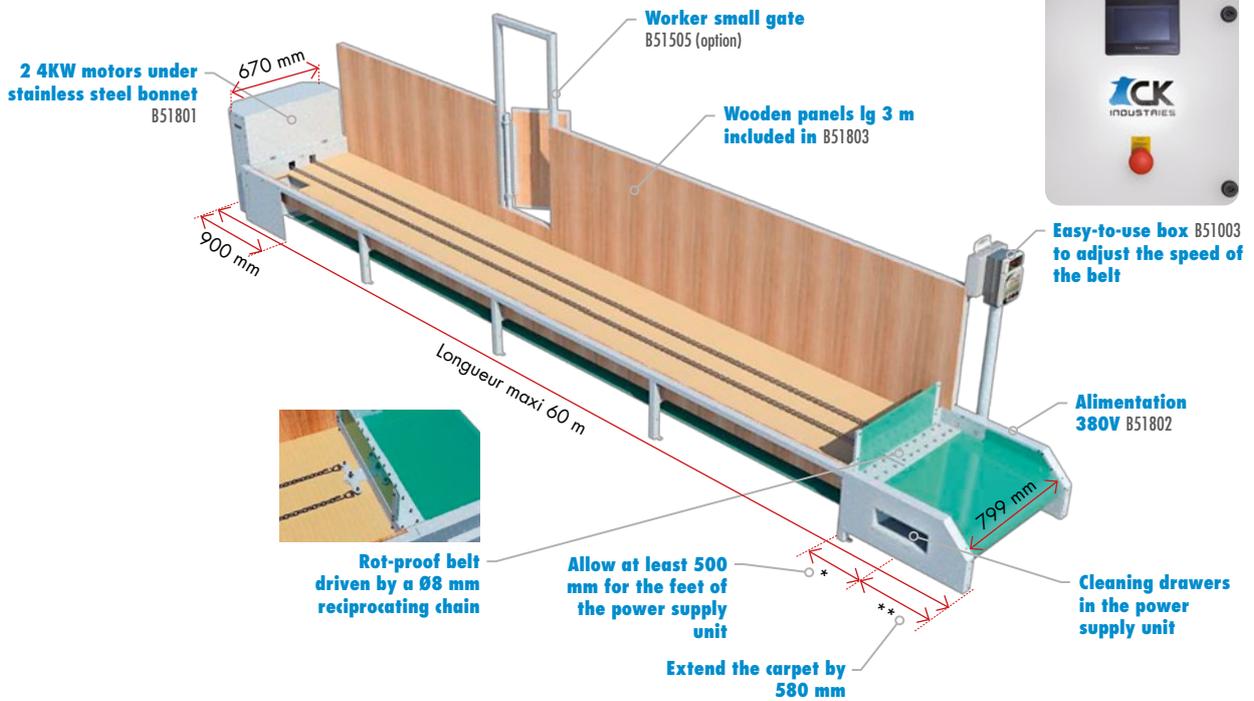

Robust and reliable, CK-Industries feed belts can be single or double access. Their operation is automated and managed by an easy-to-program control unit.

? A few advantages :

- ▶ Space saving
- ▶ Time saving
- ▶ Better management of refusals
- ▶ Safety for animals
- ▶ Lower renovation/construction costs
- ▶ Feed speed control
- ▶ Flexible belt loading
- ▶ Centralised food distribution
- ▶ Removal of the feed corridor

CKI FEED BELTS

CKI FEED BELTS

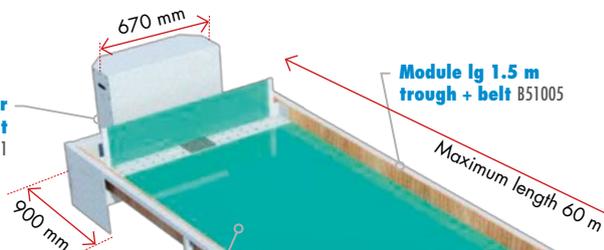

Double access

SELF-SERVICE
GALVANISED TROUGHS
FEED BELTS

2 4KW motors under stainless steel bonnet B51001

Module lg 1.5 m trough + belt B51005

Maximum length 60 m

Rot-proof belt driven by a Ø8 mm reciprocating chain

Easy-to-use box B51003 to adjust the speed of the belt

Alimentation 380V B51002

Allow at least 500 mm for the feet of the power supply unit

Extend the carpet by 580 mm

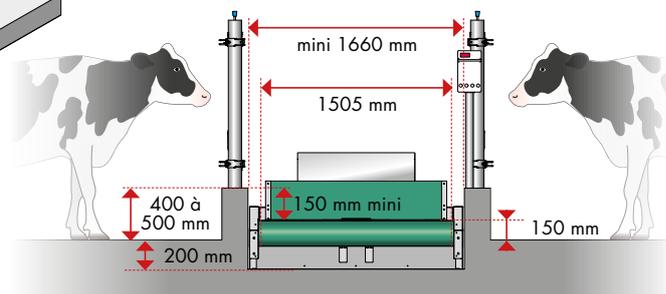

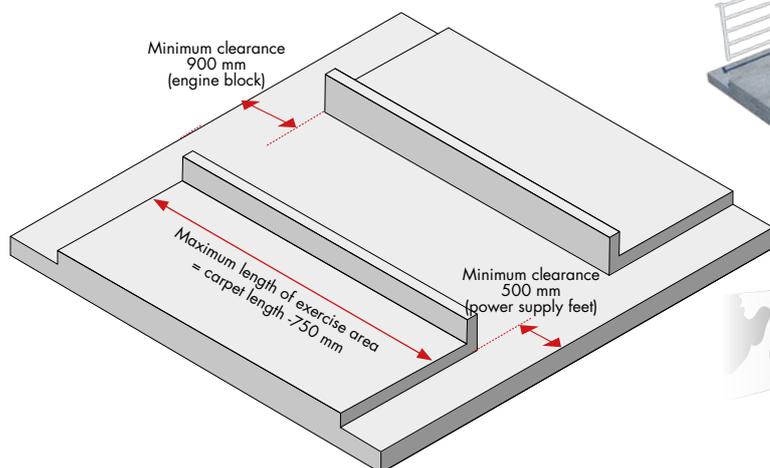

Cleaning drawers in the power supply unit

DOUBLE FEEDING CONVEYOR BELT

! Allow 4 to 6 weeks for delivery.

B51001	Motor unit for double cow's feeding conveyor belt	240 kg
B51002	Power supply for double cow's feeding conveyor belt	120 kg
B51003	Control unit for cow's feeding conveyor belt	16 kg
B51005	1500mm width feeding belt + strip of belt (multiple of 1,5m)	38 kg

Masonry recommended for mature cows :

Barriers and separations designed to last

Made in France quality

Quality materials, meticulous manufacturing and a wide variety of models are our assets in providing you with solid, durable barriers that are adapted to your requirements, both indoors and outdoors.

Some parts of our barriers are made from High-Engineering Tubes (HLE), which increase rigidity by around 20% while reducing weight by around 15 to 20%.

steel
HLE

Indoor :

- ▶ 3T extendable doors and panels p.25
- ▶ Expandable 4T doors and panels p.28
- ▶ End caps and 4T modules p.30
- ▶ Anti-return and service gates p.33
- ▶ 5T extendable gates and panels p.34
- ▶ End caps and 5T modules p.37

Pasture :

- ▶ 5T extendable gates and panels p.40
- ▶ Pasture gate end caps and modules p.42
- ▶ Fixed pasture gate p.44

Accessories :

- ▶ Round posts and collars p.45
- ▶ Fittings and locks p.46
- ▶ Square posts and collars p.47

Panel Version

Standard locking gate version

Spring-loaded gate version

Because of the possible play between the post and its sleeve, do not mount spring-loaded doors on a post inserted in a sleeve (not sealed).

► Posts and accessories, page 45

For cattle sheds fitted with scrapers, we have designed robust 3-tube barriers to allow the scraper to pass through. The Ø60 and Ø48 HLE steel tubes make them extremely sturdy. Adjustable over a length of 1 m, they are available in panel and lockable gate versions: see page 25.

Quentin Bouquin, industrial designer at CK-Industries

Posts and accessories, page 45

I took over the family farm, which had already been equipped with CK-INDUSTRIES tubulars for over 40 years. The value for money is really excellent. The building housing my 85 brood cows is fitted with CK LIBERTY fences and stall gates, and I'm very happy with them. The adjustable calf passages and the manholes on the fences are really strong and practical for everyday use.

Laurent VERNAY, Charolais breeder in the Loire

Cubicles, mattresses ? Maximise their comfort!

Ask the right questions:

The comfort of dairy cows is a real economic factor. A cow at ease and in better health grows better, produces more and naturally requires fewer veterinary costs.

When choosing your cubicles, the size of the cows is important, but the degree of homogeneity of the herd, the existing masonry or the masonry to be built, the modularity required or the speed of installation are the parameters that will help you choose the different models.

CK-Industries will work with you to find the best solution for your farm.

Find CK-Industries cubicles by type of installation :

- ▶ Floor mounting p.52
- ▶ Californian mounting (on posts) p.58
- ▶ Floating mounting on double rails p.62

The guarantee of successful breeding

CK INDUSTRIES

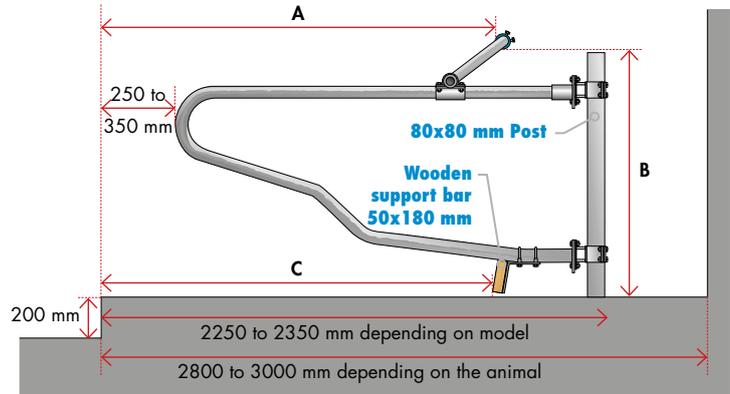

Our installation advice

Position the bar at the withers and the stopper on the ground

Depending on cow size :

Height at withers	A	B	C
1300 mm to 1400 mm	1700 mm to 1850 mm	1100 mm to 1200 mm	1600 mm to 1800 mm
1400 mm to 1500 mm	1850 mm to 1950 mm	1200 mm to 1250 mm	1800 mm to 1900 mm
+ de 1500 mm	1950 mm to 2050 mm	1250 mm to 1300 mm	1900 mm to 2000 mm

Source : IDELE

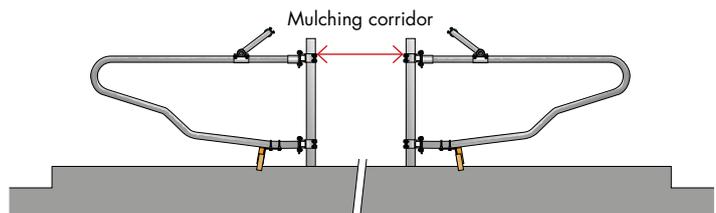

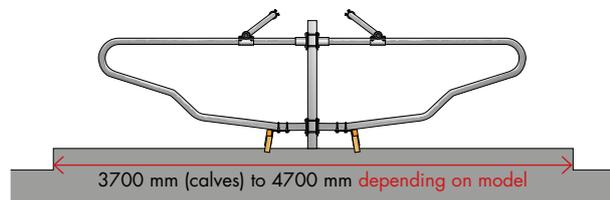

Space the cubicles well apart

Depending on cow size :

Height at withers	Cubicle spacing
1300 mm to 1400 mm	1150 to 1200 mm
1400 mm to 1500 mm	1200 to 1250 mm
+ de 1500 mm	1250 mm

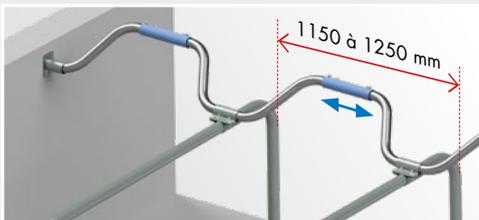

Source : IDELE

NEW

Patented Model

The new adjustable curved withers bar Ref. 53900 adjusts the width of each cubicle

Providing a comfortable sleeping area for every cow starts with the flooring.

Don't hesitate to contact us.

CK-Industries stall partition by types of assembly and animal sizes

	SUPER COSY	EASY FREE	FREEDOM	2000	CK
Stall partition	 p.52	 p.54	 p.56	 p.58 p.62	 p.60 p.64

For taller cows, choose the «BIG COW» versions of the SUPER COSY or 2000 models.

CKI SUPER COSY CUBICLES

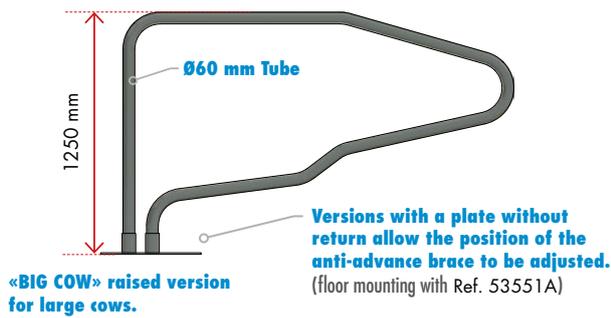

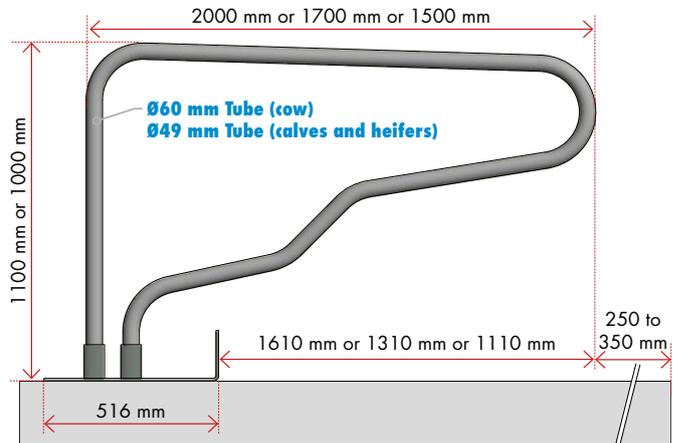

Easy floor installation and choice of format

Calves / Heifers / Cows / Large cows

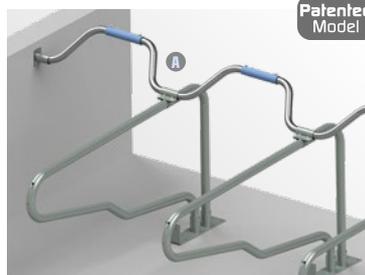

Patented Model

Sleeved feet reinforced on 8 mm thick plate.

For larger models, choose the «BIG COW» version. «BIG COW» version, L. 2000 x H. 1250 mm.

NEW

Patented Model

Ø60 galvanised coupling + epoxy coating

53900

Curved withers bar adaptable to all types of cubicles 1.15 m to 1.25 m wide. Optimises comfort by giving cows more space.
Top anti-rotation connection : all the bars are linked together. Cows can't push them out of position.

SUPER COSY Logettes are the easiest and most economical to install in the range. Available in four sizes (calves, heifers, cows and large cows), they can be fixed directly to the floor using a base plate with or without the bastaing support. Their reinforced, bent legs ensure excellent durability, and the design of the bunk is designed to maximise lying comfort.

! Please allow 4 to 6 weeks for delivery, depending on the model.

53529	Fixing kit for wooden support bar (4 x sleeper screws)	0,2 kg
53551A	Wooden bar support on floor	0,8 kg

CKI ADVICE

Adjust your cubicles: see page 51

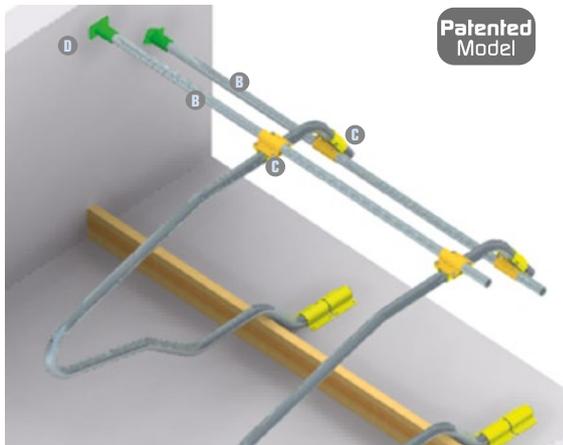

For optimum results, it is important to adjust the cubicles to suit the size of the animals. Follow the recommendations of technical institutes or vets for positioning the floor stopper (bastaing or strap) - which is compulsory for all types of cubicle - and for adjusting the height of the withers bar, whose role is to guide the head of the animal as it lies down. Straight or curved, the withers bar is an important structural element of the cubicle and contributes to its durability. Straps or flexible cables are not suitable for this purpose.

CKI EASY FREE CUBICLES

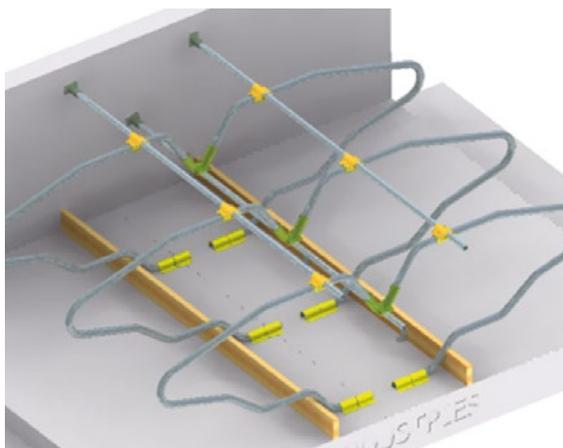

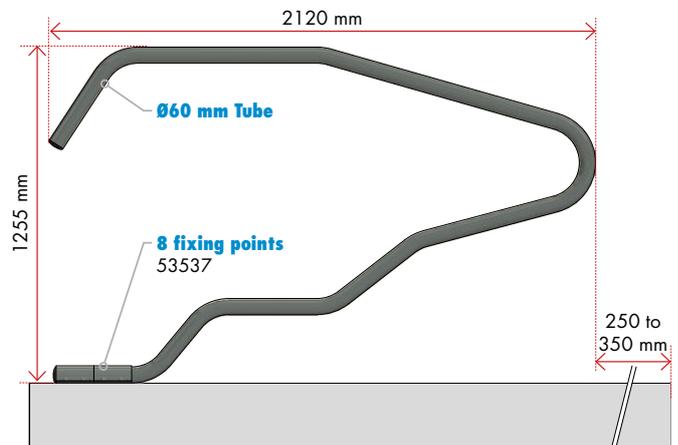

Ground installation and flexibility without posts

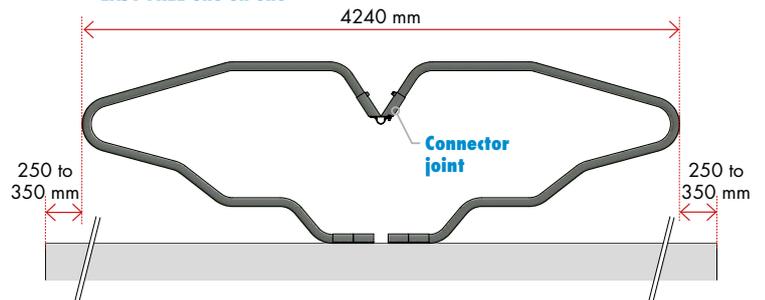

Cows

Patented Model

EASY FREE one on one

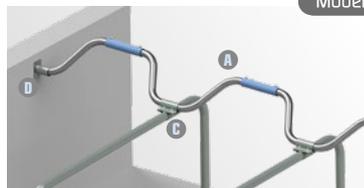

Anti-avoidance wooden support are fixed to the ground with the accessory Ref. 53551A

NEW

Patented Model

Ø60 galvanised connector + epoxy coating

53900

Curved withers bar adaptable to all types of cubicles 1.15 m to 1.25 m wide. Optimises comfort by giving cows more space.

Top anti-rotation connection : all the bars are linked together. Cows can't push them out of position.

EASY FREE cubicles are the most flexible. Mounted directly on the ground without any posts, they are elastic enough to absorb any shocks. An asset for the comfort of dairy cows. Their large dimensions make them ideal for larger cows. The EASY FREE side rail is available in a head-to-head version.

We inaugurated our 100-cow dairy barn in early 2020. It is fully equipped with CK-INDUSTRIES: scrapers, fences, barriers and cubicles. I liked the quality of the support provided by the CK sales representative and the dealer. The EASY FREE cubicles were very easy to install, because you don't need any posts. I also have buildings equipped with other brands and I can say that CK equipment is really very good quality.

Julien Adam, breeder of Pies Rouges in Brittany (France)

EASY FREE STALL REPARTITION

D	53280	Wither-bar end fitting / perpendicular wall		1 kg

WOODEN BAR SUPPORT ANTI-ADVANCE

53528	Wooden support bar 180 x 50 x 3800		35 kg
53529	Fixing kit for wooden support bar (4 x sleeper screws)		0,2 kg
53551A	Wooden bar support on floor		0,8 kg
53600	Set of fixings on floor (4 x D12 dowels)		0,4 kg

CKI ADVICE

Adjust your cubicles: see page 51

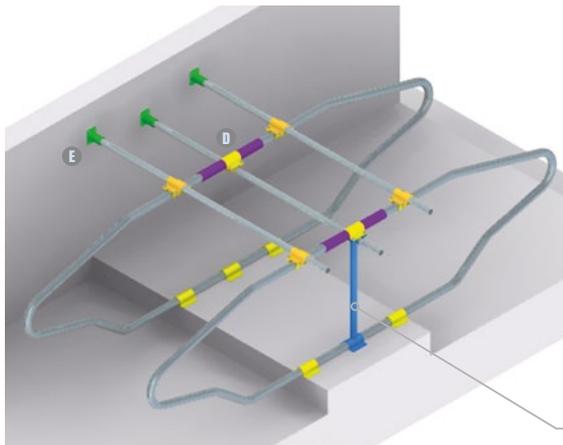

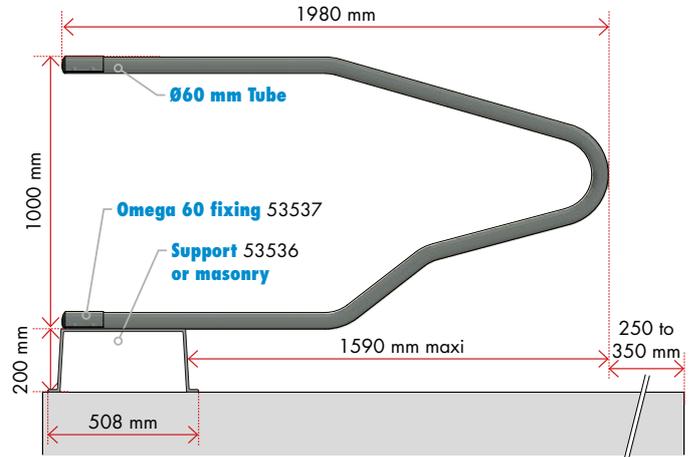

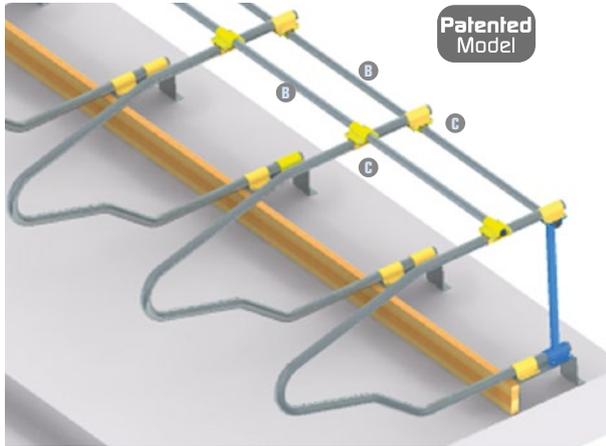

For optimum results, it is important to adjust the cubicles to suit the size of the animals. Follow the recommendations of technical institutes or vets for positioning **the floor stopper** (bastaing or strap) - which is compulsory for all types of cubicle - and for adjusting the height of the withers bar, whose role is to guide the head of the animal as it lies down. Straight or curved, the withers bar is an important structural element of the cubicle and contributes to its durability. Straps or flexible cables are not suitable for this purpose.

CKI FREEDOM CUBICLES

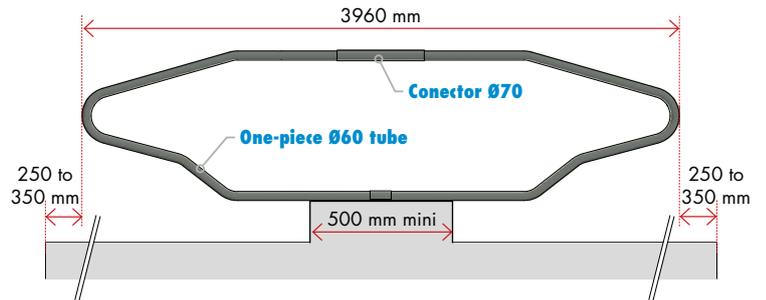

Floor installation

Cows

FREEDOM head to head with concrete anti-sway device

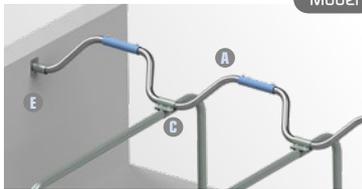

Reinforcement 53538 is required at the ends and every 6 or 10 places.

NEW

Patented Model

Ø60 galvanised conector + epoxy coating

Curved withers bar adaptable to all types of cubicles 1.15 m to 1.25 m wide. Optimises comfort by giving cows more space.

Anti-rotation top connection : all the bars are linked together. Cows can't push them out of position.

FREEDOM single or head-to-head cubicles are floor-mounted on a concrete stopper or on a bolt-on support. We recommend a reinforcement post at the ends without a wall and every 6 to 10 cubicles. The head-to-head version is sleeved for ease of assembly and increased rigidity.

! Allow 4 to 6 weeks for delivery

CKI ADVICE

Adjust your cubicles: see page 51

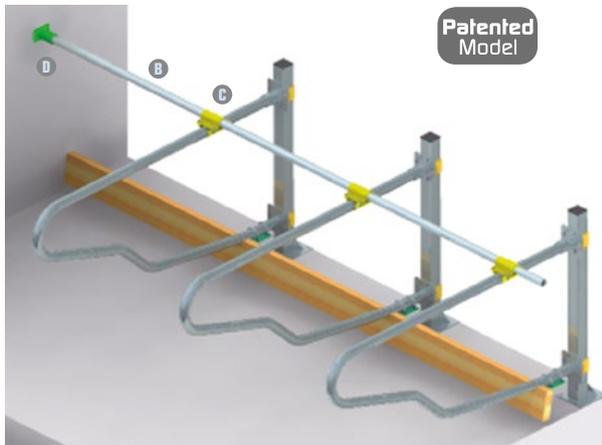

For optimum results, it is important to adjust the cubicles to suit the size of the animals. Follow the recommendations of technical institutes or vets for positioning **the floor stopper** (bastaing or strap) - which is compulsory for all types of cubicle - and for adjusting the height of the withers bar, whose role is to guide the head of the animal as it lies down. Straight or curved, the withers bar is an important structural element of the cubicle and contributes to its durability. Straps or flexible cables are not suitable for this purpose.

CKI CUBICLES 2000

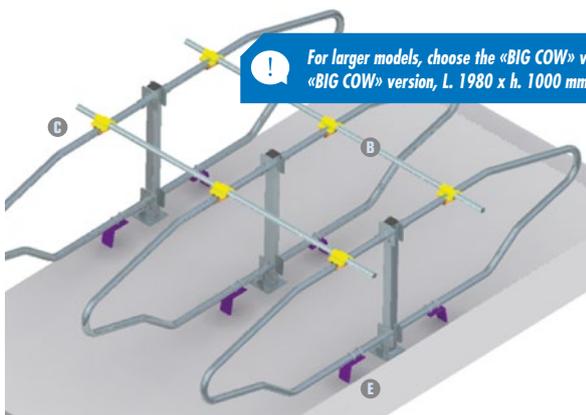

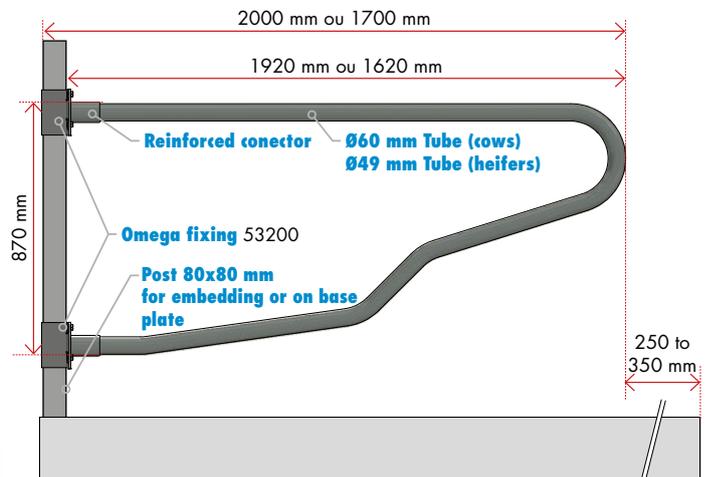

Californian mounting (on posts)

Heifers / Cows / Large cows

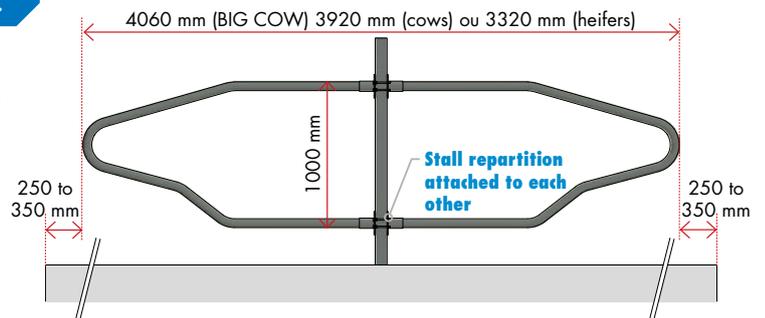

Patented Model

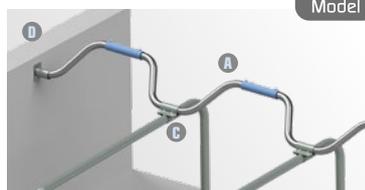

For larger models, choose the «BIG COW» version. «BIG COW» version, L. 1980 x h. 1000 mm.

BIG COW head-to-head or single version

NEW

Patented Model

Curved withers bar adaptable to all types of cubicles 1.15 m to 1.25 m wide. Optimises comfort by giving cows more space.
Anti-rotation top connection : all the bars are linked together Cows can't push them out of position.

CKI ADVICE

Adjust your cubicles: see page 51

For optimum results, it is important to adjust the cubicles to suit the size of the animals. Follow the recommendations of technical institutes or vets for positioning **the floor stopper** (basting or strap) - which is compulsory for all types of cubicle - and for adjusting the height of the withers bar, whose role is to guide the head of the animal as it lies down. Straight or curved, the withers bar is an important structural element of the cubicle and contributes to its durability. Straps or flexible cables are not suitable for this purpose.

California Cubicles 2000 are mounted on 80 mm square posts to be embedded in the ground or on a base plate, a very practical way of adapting the height of the side rails to the animals. The toggle joint for fixing the anti-tilt basting also provides plenty of scope for adjustment. The whole system can be upgraded if the size of the animals changes.

For larger models, choose the «BIG COW» version.
«BIG COW» version, L. 1980 x h. 1000 mm.

BIG COW one-to-one or single version

NEW

Curved withers bar adaptable to all types of cubicles 1.15 m to 1.25 m wide. Optimises comfort by giving cows more space.
Top anti-rotation connection : all the bars are linked together. Cows can't push them out of position.

CKI ADVICE

Adjust your cubicles: see page 51

For optimum results, it is important to adjust the cubicles to suit the size of the animals. Follow the recommendations of technical institutes or vets for positioning **the floor stopper** (basting or strap) - which is compulsory for all types of cubicle - and for adjusting the height of the withers bar, whose role is to guide the head of the animal as it lies down. Straight or curved, the withers bar is an important structural element of the cubicle and contributes to its durability. Straps or flexible cables are not suitable for this purpose.

The Cubicles 2000 are available for heifers, adult cows and large cows, and are fitted with a «floating» assembly to allow maximum adjustment over time. This assembly is based on posts placed every 2.5 to 3 m, supporting two 60cm square rails, so that all bedding dimensions can be adjusted as the herd grows.

CKI INDUSTRIES

Inseminations, ultrasounds and searches deserve a dedicated area in the building. Appropriate restraint equipment greatly improves comfort and safety for both people and animals. The CK-Industries fencing dedicated to insemination is available on its own or as a 5-tube barrier module. A complete box will make the operation easier and will also enable caesarean sections to be performed in the best possible conditions.

Forming holding pens, or even corridors to handle grazing cattle, is an excellent way of facilitating animal handling whatever the plot. CK-Industries' mobile barriers are available in lengths of 2 to 3 m, and offer a number of practical features such as ski feet and a quick-release system that adapts to any unevenness in the terrain. The transporter enables around twenty of them to be loaded onto the tractor's 3-point linkage or pallet fork.

For Calves

For the future of the herd

The right equipment

guarantees comfort and safety:

The first 6 months of a bovine's life are a key period, whether for a quick sale or to ensure the herd's long-term future.

Whether for housing or feeding, we recommend equipment specially adapted to the age and size of young cattle. This ensures that they are comfortable and safe so that they can grow up healthy.

CK-Industries offers a range of products specially designed for rearing dairy and veal calves.

Find all the equipment for calves:

- ▶ Headlocks, barriers and accessories
- ▶ Individual boxes and niches
- ▶ Hay-racks and feeders

CKI FIXING ACCESSORIES

for calf pens

Our 76 mm round posts are 3 mm thick and fitted with a plug.

CKI ADVICE

Prevent corrosion :

Given the ever-increasing concentration of corrosive products in slurry, manure and silage, we recommend that you coat all parts in contact with them with a bitumen-based paint.

Bitumen paint 5 litres

CKI INDIVIDUAL CALF PENS

practical, modular and easy to maintain

Patented Model

The first few weeks of a calf's life are crucial. That's why we offer solutions for comfortable, hygienic nurseries. CK-Industries modular individual calf pens on slatted floors are light, robust and easy to maintain. Available in lengths of 1.50 m or 1.85 m, they feature a double feed fence with an adjustable neck and a lifting slatted floor. For outdoor nurseries, we offer a wide range of individual or collective kennels, Please do not hesitate to contact us.

Reliability and durability

 **More than 40 years' experience :**

A cow's foot is a complex structure that needs to be looked after.

Frequent cleaning of the alleys contributes to the good health and performance of your herd.

CK-Industries has been designing and manufacturing scraping systems for over 40 years. The range includes chain, rope and cable scrapers, hydraulic scrapers and evacuators.

These systems can be automated or even connected.

Find out more about our range of scrapers in the dedicated CK-Industries catalogue.

Scraper systems

We offer a complete range of robust, reliable and durable automated scraping systems for cubicle buildings or straw barns.

STRAIGHT SCRAPER for liquid manure

- Weightable, hot-dip galvanized
- Mobile central shutters that can be lifted
- Scraper height: 200 mm or 250 mm
- Side wings, lg : 1 m ; Thickness: 15 or 30 mm
- Quick opening
- Reduced space in parking position (2 m)
(Offset planer / corridor possible)

U-shaped SCRAPER for solid manure

- Weightable, hot-dip galvanized
- Mobile central shutters that can be lifted
- Scraper height: 250 mm
- Side wings, lg : 1 m ; Thickness: 30 mm
- Quick opening
- Reduced space in parking position (3 m) (Offset planer / corridor possible)

V-shaped SCRAPER

- Weightable, hot-dip galvanized
- Blades adjustable to the corridor width
- Scraper height: 250 mm
- ATTENTION:
Provide 1,5 x corridor width for parking position.

Evacuators and spare parts for all brands

General sales terms

Article 1 - Application and opposability of the general terms.

The present general sales terms are applicable and prevail over all of our customers purchasing conditions. Consequently, by placing an order, the buyer fully agrees, without any reservation to these general sales terms, excluding all other documents including brochures, catalogues that are produced by our company and which are only given for information purposes.

The fact that one or any of the present general sales conditions does not prevail at any point in time cannot be interpreted as the renouncing of this prevalence at a later date of any of the said conditions.

Article 2 - Orders

Orders are given to our representatives or agents, or are sent directly to our departments. These will only be definitive following our written acceptance within a period of 8 days following their reception at headquarters, on the express condition that they are accompanied by the buyer's bank and commercial references allowing us to take a decision.

We reserve the right to ask for any additional guarantee and to suspend the execution of any order, even once it is accepted, until this request is satisfied.

Article 3 - Order modification

The order form constitutes a firm and irrevocable commitment by the buyer if no request for modification or cancellation by registered letter with its acknowledgment of receipt is sent within the period of 8 days following acceptance of the order by our departments under the above-mentioned conditions.

Article 4 - Delivery

Unless otherwise stipulated, delivery is considered ex works (EXW) CK-Industries 1350 route de la Tuilerie 42130 Marcoux France (Incoterms 2020).

Deliveries are only made according to product availability and according to the order in which orders are received. We are authorized to proceed with deliveries in either an overall or partial manner.

The delivery times are only given for information purposes on the order forms. Should a delivery time be exceeded, under no circumstance does this lead to any right for compensation, nor the cancelling of current orders. However, if one month after the indicative delivery date and after notification that remains without a response, the product still has not been delivered, for any cause other than force majeure, the sale may be cancelled by one or both parties, without the buyer being able to have any compensation, interest or any other indemnity.

Cases of "force majeure" are decided within the terms of Article 1148 of the Civil Code, thus releasing our company from its obligation to deliver: war, riot, fire, strike, accidents, the impossibility for our company itself to be supplied.

We will keep the buyer informed as appropriate of the above cases and events.

Under any circumstance, delivery within the delivery time can only occur if the buyer is released of his obligations towards our company, for whatever cause.

The delivery products will in all cases travel at the buyer's risk and peril, and should there be any problem or discrepancy, the latter should make all the necessary observations on the CMR consignment note and confirm these reservations via an extra-judicial act or registered letter with acknowledgment of receipt to the carrier within 2 days following receipt of the goods. A copy of this letter must be sent at the same time to CK Industries. It is detailed that the "reservations" statement put on the CMR consignment note does not have any value relative to any appeal with the latter's insurance company.

Article 5 - Reception

Without prejudicing the measures to be taken relative to the carrier within the legal periods, complaints concerning apparent defects or non-conformity of the delivered product with the ordered product or with the shipping note, must be sent in writing within 8 days of the product delivery.

Complaints for hidden defects will be subject to an examination by our company and under no circumstance will these be considered unless they fall within the time frames provided for in Article 1640 of the Civil Code.

It is up to the buyer to provide any justification relative to the reality of these defects or observed anomalies. He must facilitate operations for our company in carrying out the inspection of these defects in order to provide a solution. He will not act himself or have any third party involved for this purpose.

Article 6 - Property rights

The equipment and products delivered remain our property until 100% payment of the principal and other charges. The buyer is consequently prohibited from selling on the sold goods before they are fully paid for.

Payment is not considered, in the terms of this clause, as being the submitting of a security creating an obligation to pay (draft or other) defaulting on the payment at any of the payment terms could lead to claims on the goods.

This measure does not create an obstacle, as of the delivery date, to the transferring of risks for loss or deterioration of goods fully to the buyer.

The buyer is obliged to ensure that identification of the goods must always be possible and to maintain them insured against any risk of loss or deterioration on behalf of the company as long as they remain its property, as soon as the sales contract is concluded.

Article 7 - Guarantee

Guarantee provided to consumers, within the framework of Law 78-28 dated January 10th, 1978 ; in conformity with Article 4 of Decree number 78-464 dated March 24th, 1978, in application of the above-mentioned Law, it is reminded that non-professional buyers benefit from a legal guarantee for hidden defects under the terms of Article 1641 and following in the Civil Code.

Guarantee given to professionals:

The guarantee provided by the company lasts for a period of 1 year starting from the date of delivery of the products and only applies to full installations of muck handlers and slurry scraping systems. For the above defined period, the guarantee is limited to simple replacement, one for one, of parts that CK Industries has recognized as being faulty without other service or indemnity.

Limits of guarantee:

The guarantee does not work for apparent defects. Neither does the guarantee apply for defects and deterioration caused by natural wear or by an external accident (defective or incorrect or inadequate maintenance, abnormal or incorrect use, assembly or work not carried out by our company or a company duly approved by ourselves) or by modification of the product which is not provided for nor specified by CK Industries.

Article 8 - Price

Our prices are net, ex works, excluding tax on the basis of the prices sent to the buyer, unless otherwise stipulated, expressly and in writing by our sales departments. CK Industries reserves the right to modify the prices mentioned in its quotations and catalogues in order to take into account the variations in components and economic conditions which determine the latter.

Any tax, duty or other service to be paid for in application of French regulations or those of the importing country or a transiting country are covered by the buyer. Unless agreed to in writing by ourselves, carriage charges are always covered by the buyer.

Article 9 - Invoicing

An invoice is issued for each delivery and sent on delivery, unless a delivery note has been sent in which case a summary invoice will be drawn up within 8 days.

ARTICLE 10 - Payment

Our invoices are payable in Marcoux (Loire). Bankers' drafts, agreements as well as any delivery location cannot change or implement a derogation to this clause. Payment of any invoice for an amount less than 100 Euros excluding tax will be required with the order, by cheque and without any discount. Apart from specific conditions, our invoices are payable by bankers' drafts dated 30 days at the end of the following month.

Payments carried out to our representatives will not be considered received. When payment is carried out by accepted bankers' drafts, it is expressly agreed that defaulting on the payment at any one of the due dates will lead to a breaking of payment terms and will make all the other due dates immediately due, whatever the payment mode initially planned.

In the case of non-payment on a due date, the amounts that remain due, in conformity with Law number 92-1442 dated December 31st, 1992, will be subject to the application of late payment penalties calculated at a rate equal to one and half times the legal interest rate. Late payment defined in this way will be due fully without any formal notification being required. Any court action to recover a debt will lead to an increase of 15% of the due amounts, in addition to late interest, without prejudicing any possible compensation and interest entitlement.

In addition, in the event of late payment, the buyer will automatically owe us, in addition to the late payment penalties already provided for above, a fixed indemnity for collection costs of €40.

Article 11 - Transfer of risk

The transfer of risk on products takes place as soon as they are shipped from our warehouses. And this results in the goods traveling at the buyer's risk and peril. It is therefore up to the buyer in the case of a problem, loss or missing product, to inform the carrier responsible of their reservation and lodge their claim with the latter.

Article 12 - Returns

Any return of equipment must be previously subject to a formal agreement between our company and the buyer. No return will be accepted after a period of 1 month following the delivery date.

However, any returned equipment following acceptance will be subject to a minimum deduction of 30% of its invoiced price excluding taxes by CK Industries plus a fee of 10 Euros for administrative expenses.

Transport costs as well as risks of return will always be covered exclusively by the buyer.

In the case of an apparent defect or non-conformity of the products delivered, duly noted by our company, under the conditions provided for above, the buyer may obtain the free replacement of products, without the right to any indemnity or compensation and interest. Any product returned without CK Industries' agreement will be held available for the buyer without the latter being able to request any indemnity or any compensation and interest.

Article 13 - Confidentiality

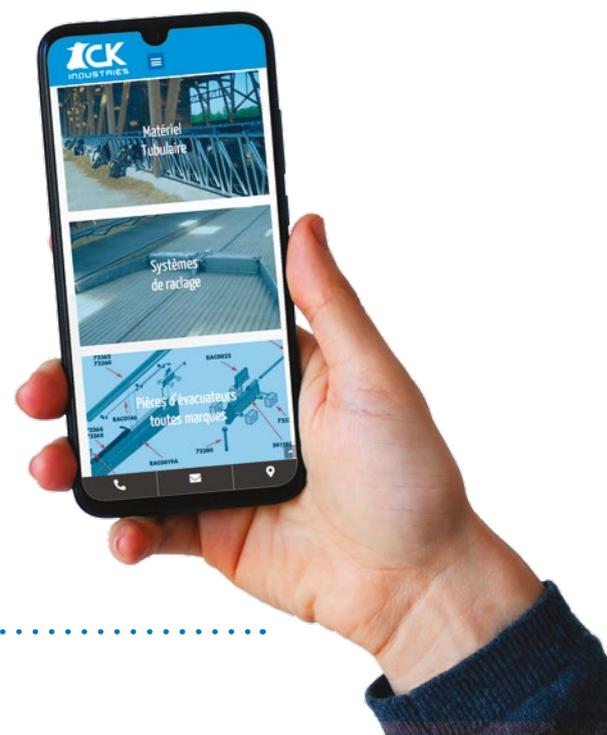

The buyer is prohibited from communicating to any third party all drawings, studies, manuals of other manufacturer's documents, provided at the time of the purchase by departments.

Article 14 - Competent court

Any dispute concerning the execution of the present conditions relative to the national or international sale, even in the case of a warranty appeal or multiple defendants will, if no amicable agreement is reached, be exclusively dealt with by the Montbrison Court of Commerce.
