

## Potato Protection Fabric

Toptex Potato Protection Fabric offers optimum protection of your potatoes from rain, snow and frost. Reduced mass and starch losses will increase your yields, and reduced soil contamination will ease up industrial processing.

### The benefits at a glance

- ✓ Protection against rain and snow
  - ✓ Effective frost protection without annoying frequent covering/de-covering
  - ✓ Reduced soil contamination with low efforts
  - ✓ Reduced mass and starch losses
- = **Higher yield!**

**TENCATE**  
**Toptex**<sup>®</sup>

Toptex is a nonwoven made from 100% UV stabilized polypropylene - strong, durable and allowing respiration.

**5 years life-time** under normal conditions. The life-time can be increased when Toptex is protected from UV light when not in use.

### Forms of Supply

Width	9,80 m	9,80 m
Roll width	2,45 m	2,45 m
Length	25 m	12,5 m
Roll weight	35 kg	17 kg

# Potato Protection Fabric

## Possible pit configurations

- **water shedding** - (protects potatoes from precipitation)
- **respiring** - (no condensation, potatoes will dry up)
- **temperature balancing** - (protects from early frost\*, avoids excessive heating-up)

\*) Only in the case of long-lasting, strong frost (below -5°C) we recommend the additional covering with a plastic film.

## Easy handling

Annoying frequent covering and de-covering with water and air-tight plastic films is no longer necessary!
